

HPS Distributor

Compact power distributor
for high current loads

HIRSCHMANN
AUTOMOTIVE

EFFICIENT POWER DISTRIBUTION FOR THE EXPANSION OF IN-VEHICLE HIGH-VOLTAGE NETWORKS.

The electrification of the mobility sector requires, among other things, an efficient connection of current-carrying lines in high-voltage vehicle electrical systems. For example, it becomes increasingly necessary to distribute power to two HV units. With our HPS Distributors, this can be achieved safely.

The product design of our power distributors impresses with its extremely compact construction and its high scalability – due the use of standard components, we can cover a wide range of cross-sections.

Characteristics:

- compliant with several automotive test specifications
- watertight according to IP6K9K
- 360° shielded connection
- different cable cross section possible
- compact design
- high current load at high ambient temperatures
